Common SSB Requisition Mistakes

Pressing the Enter key on your keyboard

SSB Banner is a point and click form. When pressing the enter key on your keyboard it will bring you to a document/code lookup or you will get an invalid message. Do not use the Enter Key function.

Fields are case sensitive

♦ When using code lookup use upper and lower case characters.

Leaving the Chart of Accounts blank when retrieving your FOP from your index

To retrieve your FOP you must enter in the Chart as N and your index. Then click validate.

Seq#	Chart	(i Index	Fund	Orgn	Account	Program	Activity	Location	Accounting
									[
2						1			
									<u> </u>
						1			
	_		- i			· <u> </u>		·	,

Leaving it blank will give you a confusing error such as Invalid Index

Entering in the Account before you Validate the Index into the FOP

The account will be erased when you click validate. You will need to re-enter the Account.

Total Accounting must equal 100

After Validating the index to populate the FOP an error message saying

🗙 Total of Accounting percents does not equal 100

This is stating you need to make sure the Accounting field is populated before you complete the req.

Seq#	Chart	Index	Fund	Orgn	Account	Program	Activity	Location	Accounting
1	N		222222	111111		5080			
2			[1	
3									-
4		[[
5								· · · · ·
